PLANT AND SOIL

Contents Volume 282 Nos. 1–2 April 2006

Commentary
The nitrogen transfer between plants: An important but difficult flux to quantify
H. Høgh-Jensen **1–5**

Nitrogen transfer between plants: A ^{15}N natural abundance study with crop and weed species
K.A. Moyer-Henry, J.W. Burton, D.W. Israel and T.W. Rufty **7–20**

Commentary
Countering UV-B stress in plants: Does selenium have a role?
A.K. Shanker **21–26**

Responses of strawberry (*Fragaria*× *ananassa*) to supplemental UV-B radiation and selenium under field conditions
J. Heijari, M. Kivimäenpää, H. Hartikainen, R. Julkunen-Tiitto and A. Wulff **27–39**

Genetic diversity of rhizobia nodulating *Arachis hypogaea* L. in Central Argentinean Soils
T. Taurian, F. Ibañez, A. Fabra and O.M. Aguilar **41–52**

Specific interactions between local metallicolous plants improve the phytostabilization of mine soils
H. Frérot, C. Lefèbvre, W. Gruber, C. Collin, A.D. Santos and J. Escarré **53–65**

Determination of spatial distribution patterns of clay and plant available potassium contents in surface soils at the farm scale using high resolution gamma ray spectrometry
G. Pracilio, M.L. Adams, K.R.J. Smettem and R.J. Harper **67–82**

Effects of plant species diversity and composition on nitrogen cycling and the trace gas balance of soils
P.A. Niklaus, D.A. Wardle and K.R. Tate **83–98**

Impact of the maize rhizosphere on the genetic structure, the diversity and the atrazine-degrading gene composition of cultivable atrazine-degrading communities
F. Martin-Laurent, B. Barrès, I. Wagschal, S. Piutti, M. Devers, G. Soulas and L. Philippot **99–115**

Spatio-temporal variations in axial conductance of primary and first-order lateral roots of a maize crop as predicted by a model of the hydraulic architecture of root systems
A. Pierret, C. Doussan and L. Pagès **117–126**

Physiological indicators of plant water status of irrigated and non-irrigated grapevines grown in a low rainfall area of Portugal
T.A. Sousa, M.T. Oliveira and J.M. Pereira **127–134**

Response of litter decomposition to simulated N deposition in disturbed, rehabilitated and mature forests in subtropical China
J. Mo, S. Brown, J. Xue, Y. Fang and Z. Li **135–151**

Short-term responses of soil C and N fractions to tall fescue endophyte infection
A.J. Franzluebbers **153–164**

Accumulation and loss of nitrogen in white clover (*Trifolium repens* L.) plant organs as affected by defoliation regime on two sites in Norway
I. Sturite, M.V. Uleberg, T.M. Henriksen, M. Jørgensen, A.K. Bakken and T.A. Breland **165–182**

Difference in selenite absorption between high- and low-selenium rice cultivars and its mechanism
L. Zhang, W. Shi and X. Wang **183–193**

Interspecific competition for soil N and its interaction with N_2 fixation, leaf expansion and crop growth in pea–barley intercrops
G. Corre-Hellou, J. Fustec and Y. Crozat **195–208**

Arbuscular mycorrhizas, microbial communities, nutrient availability, and soil aggregates in organic tomato production
T.R. Cavagnaro, L.E. Jackson, J. Six, H. Ferris, S. Goyal, D. Asami and K.M. Scow **209–225**

Analysis of micro-nutrient behaviour in the rhizosphere using a DGT parameterised dynamic plant uptake model
N.J. Lehto, W. Davison, H. Zhang and W. Tych **227–238**

Phosphorus transformations under reduction in long-term manured soils
F. Ajmone-Marsan, D. Côté and R.R. Simard **239–250**

Overstory community composition and elevated atmospheric CO_2 and O_3 modify understory biomass production and nitrogen acquisition
J.M. Bandeff, K.S. Pregitzer, W.M. Loya, W.E. Holmes and D.R. Zak **251–259**

Chemical composition and decomposition of silver birch leaf litter produced under elevated CO_2 and O_3
A. Kasurinen, J. Riikonen, E. Oksanen, E. Vapaavuori and T. Holopainen **261–280**

Partitioning of respiration in an intensively managed grassland
K.A. Byrne and G. Kiely **281–289**

The mechanism of nitrate accumulation in pakchoi [*Brassica campestris* L.ssp. Chinensis(L.)]
J. Luo, S. Sun, L. Jia, W. Chen and Q. Shen **291–300**

Coupling N cycling and N productivity in relation to seasonal stress in *Quercus pyrenaica* Willd. saplings
F. Silla and A. Escudero **301–311**

Differential ^{13}C isotopic discrimination in maize at varying water stress and at low to high nitrogen availability
G. Dercon, E. Clymans, J. Diels, R. Merckx and J. Deckers **313–326**

Autotoxicity against germination and seedling emergence in *Cistus ladanifer* L
J.C. Alías, T. Sosa, J.C. Escudero and N. Chaves **327–332**

Root water uptake efficiency under ultra-high irrigation frequency
E. Segal, A. Ben-Gal and U. Shani **333–341**

Evaluation of the PNM model for simulating drain flow nitrate-N concentration under manure-fertilized maize
J.M. Sogbedji, H.M. van Es, J.J. Melkonian and R.R. Schindelbeck **343–360**

Hydraulic lift in cork oak trees in a savannah-type Mediterranean ecosystem and its contribution to the local water balance
C. Kurz-Besson, D. Otieno, R.L. do Vale, R. Siegwolf, M. Schmidt, A. Herd, C. Nogueira, T.S. David, J.S. David, J. Tenhunen, J.S. Pereira and M. Chaves **361–378**

Effects of single Chinese fir and mixed leaf litters on soil chemical, microbial properties and soil enzyme activities
Y.L. Hu, S.L. Wang and D.H. Zeng **379–386**
